

TEST SUMMARY REPORT

E-Commerce Web Application

Document: Test Summary Report

Testing Type: Manual Testing

Tester: Neha Bihade

Version: 1.0

Environment: Windows 10/11, Google Chrome

Test Management: Microsoft Excel

1. Project Overview

The E-Commerce Web Application was tested to verify the functionality, usability, validation, and reliability of major user workflows.

The testing covered Registration, Login, Product Search, Product Listing, Shopping Cart, Checkout, Payment, Order Management, Navigation, and UI functionality.

2. Testing Objectives

The main objectives of testing were:

- Verify application functionality against defined requirements.
- Identify functional and UI defects.
- Verify positive and negative scenarios.
- Validate user input and error handling.
- Verify major business workflows.
- Perform regression and retesting where applicable.
- Document test results and defects.

3. Testing Scope

Modules Tested

- Registration
- Login
- Product
- Product Search
- Product Filter
- Shopping Cart
- Checkout
- Payment
- Order Management
- Navigation
- UI

4. Testing Types Performed

- Functional Testing
- Smoke Testing
- Sanity Testing
- Regression Testing
- Retesting
- UI Testing
- Negative Testing
- Exploratory Testing
- Boundary Value Analysis
- Equivalence Partitioning

5. Test Execution Summary

Update these numbers after you actually execute the test cases.

Metric	Result
Total Test Cases	50
Executed	TBD
Passed	TBD
Failed	TBD
Blocked	TBD
Not Executed	TBD
Total Defects	TBD
Critical Defects	TBD
High Defects	TBD
Medium Defects	TBD
Low Defects	TBD

TBD = To Be Determined after test execution.

6. Defect Summary

Severity	Total	Open	Fixed	Closed
Critical	TBD	TBD	TBD	TBD
High	TBD	TBD	TBD	TBD
Medium	TBD	TBD	TBD	TBD
Low	TBD	TBD	TBD	TBD
Total	TBD	TBD	TBD	TBD

Defects were documented in the Bug Report document with:

- Bug ID

- Test Case ID
- Bug Title
- Steps to Reproduce
- Expected Result
- Actual Result
- Severity
- Priority
- Environment
- Status

7. Test Environment

Component	Details
Operating System	Windows 10/11
Browser	Google Chrome
Testing Method	Manual Testing
Documentation	Microsoft Excel
Repository	GitHub

8. Entry Criteria

Testing was started after:

- Applications are available.
- Required modules are accessible.
- Test scenarios and test cases were prepared.
- A test environment was available.

9. Exit Criteria

Testing will be considered complete when:

- All planned test cases are executed.
- Critical functionality has been verified.
- Identified defects have been documented.
- Fixed defects have been retested.
- Regression testing has been completed.
- Final test results have been documented.

10. Risks and Limitations

- Testing was performed in a limited browser/environment.
- Performance and load testing were not performed.
- Security penetration testing was not performed.

- Database testing was not performed.
- Results may vary depending on the test environment.

11. Overall Test Result

Status: TBD – Testing in Progress

The final status will be updated after all planned test cases have been executed, and the identified defects have been evaluated.

12. Conclusion

The E-Commerce Web Application was evaluated using a structured manual testing approach.

Testing activities included requirement analysis, test scenario preparation, test case design, test execution, defect identification, retesting, and regression testing.

The final testing conclusion will be provided after completion of test execution and defect verification.

13. Deliverables

The following testing artifacts were prepared:

1. Test Plan
2. Test Scenarios
3. Test Cases
4. Bug Reports
5. Requirement Traceability Matrix
6. Test Execution Report
7. Test Summary Report

14. Tester

Name: Neha Bihade

Role: Manual Tester

Status: Testing Project
